1 Introduction

This is the first chapter of our document. It contains some basic text and demonstrates the functionality of the LaTeX expansion tool.

1.1 Background

~~Here we discuss the background of our work. This section has been significantly expanded in this version of the document with new research findings.~~ Here we discuss the background of our work. This section will be expanded in future versions of the document.

$$E = mc^2 \tag{1}$$

The famous equation above shows the relationship between energy and mass. ~~We have also discovered that this relationship has important implications for our research.~~

2 Methods

This chapter describes the methods used in our research.

2.1 Experimental Setup

We used the following equipment:

- Microscope
- Computer
- Data acquisition system

2.2 Data Analysis

The data was analyzed using statistical methods and specialized software.
